

TPR Westflex LED Neon Typical Wiring Layout

White Light and Solid Colors

Note: the home runs are 18/2 with a plus and a minus. Polarity must be maintained.

Notes: The LED White or Solid Color neon can be run up to 21' on a single feed and 22-42' when fed from both ends. The STICK series wallpad mounts to a single gang box and comes with a 9VDC mini-power supply. Westpower300's are indoor rated only and can be put in a Nema box, but power supplies are outdoor rated.
