

TPR SPLITTER-BOOSTER

IP44

TPR SPLITTER-BOOSTER

Description:

The **TPR Splitter-Booster** is a dry location DMX accessory for conveniently branching your DMX signal to multiple locations. It is placed in line between the DMX controller and the DMX fixtures to split the signal into outputs. The signal is also amplified and opto-isolated for maximum strength and protection. The Splitter-Booster uses 3 Pin XLR connections for durability, and is rated IP44 for indoor use. When used in outdoor applications it must be placed in a Nema 4 enclosure.

Specifications: *
