

TPR WIRELESS TRANSCIVER

IP65

Description:

The **TPR Wireless Transceiver** is an outdoor rated device for Transmitting or Receiving DMX signal over long distances. With simple on board programs it can be set as a Transmitter or Receiver, and can link up to 900' away with no cabling. This 2.4GHz device can save extreme amounts of cabling and installation costs, and allow you to put fixtures in locations where only power exists.
