

TPR COVEMAX® 25 DEGREE EXTRUSION

Description:

The **TPR Westflex® 25 Degree Extrusion** is an aluminum channel with UV inhibitive acrylic lens accessory for the White Light and Solid Color tape lights. The lens takes the wide beam angle and collimates it into a narrow 25 degree beam for scraping up and down walls. The fixture comes up to 6' long and can be cut to length. With a low profile end cap these can be run end to end for a near seamless look.

Specifications: *
